Company Overview & Core Competencies

TBD Telecom By Design Inc. is a nimble organization comprised of seasoned professionals located in Toronto, ON CANADA. We specialize in:

- **Installation and Service of Telecom Communications Systems**
- **Structured Network Cabling Installation**
- **Testing and Terminating of Cables**
- **VoIP Telephone Systems and Hybrid Telephone Systems**

We install **structured cabling** when a company, division, or team is moving or renovating their physical location and require data cables, racks, cable management, or re-testing at the new location/between locations.

We support IT, Telecom, and Logistics Departments, Project Managers and General Contractors responsible for facilities or moving employees – typically our portion falls within the responsibility of all of these groups.

Our experience in the industry includes **supplying hardware and network solutions for multi-site customers** and we maintain ongoing relationships as preferred vendors. We have completed **design and audit requirements** for municipalities, financial institutions and corporate clients.

We understand the delicate planning involved and will confidently support your team and project initiatives.
